Ticket comments
Email seems very suspect and might contain malware. These are the findings that made me suspicious. Misspellings in the subject line for a job position, from an unknown source. Resume and cover letter from someone applying for a job position, sent to HR. Instead of it being a pdf file it's an encrypted file that needs a password to open. The file seems to run a .exe program when clicked. File hash was imputed onto virustotal and it shows that the file is malicious.

Additional information

Known malicious file hash:

Subject: Re: Infrastructure Egnieer role

Dear HR at Inergy,

I am writing for to express my interest in the engineer role posted from the website.

There is attached my resume and cover letter. For privacy, the file is password protected. Use the password paradise10789 to open.

Thank you,

Clyde West
